

WHAT IS CLAIMED IS:

1. A system, comprising:
a vehicle;
at least one player on the vehicle and selected from the group consisting of: radios, and audio-video players; and
at least one processor for receiving at least one voice command and in response thereto determining at least one of: content, and a channel, for the player to play.
2. The system of Claim 1, wherein the processor accesses a database onboard the vehicle to determine a channel to tune the player to in response to the voice command.
3. The system of Claim 1, wherein the processor accesses a database onboard the vehicle to determine content to display on the player.
4. The system of Claim 1, wherein the processor wirelessly accesses the Internet to obtain at least one of: content, and channel information, satisfying the voice command.

5. The system of Claim 4, wherein the processor causes the player to play content from the Internet, in response to the voice command.

6. The system of Claim 1, wherein the player is a radio and the processor tunes the radio to a channel in response to the voice command.

7. The system of Claim 6, wherein the processor accesses a database to determine the channel to tune the radio to.

8. A system for a vehicle, comprising:

player means mountable onboard the vehicle for playing audio and/or audio-video content;

means for receiving a voice command; and

at least one of:

means for tuning the player to a channel in response to the voice command; and

means for determining content to display on the player in response to the voice command.

9. A method for tuning a radio in a vehicle, comprising:

issuing a voice command;

-10-

digitizing the voice command to render a digitized command;
correlating the digitized command to a radio channel; and
automatically tuning the radio to the radio channel.

10. The method of Claim 9, wherein the correlating act is undertaken using vehicle position information.

11. The system of Claim 1, wherein the voice command is a non-channel number voice command.

12. The system of Claim 8, wherein the voice command is a non-channel number voice command.

13. The method of Claim 9, wherein the voice command is a non-channel number voice command.
